

Preventative Maintenance Optimization (PMO) in Dollars & \$ense™

Unfortunately, most preventive maintenance programs fail to do what they're supposed to do – prevent failure! Some PM tasks actually cause failure. Others don't do any harm or good. Still others could be effective if they were clearer, less ambiguous or performed at a more appropriate interval. Also, many organizations have incorporated condition-based maintenance into their PM policy, but failed to eliminate the time-based tasks the condition-directed tasks were intended to replace.

In this course, taught by Drew Troyer, you'll learn how to:

- Evaluate the value proposition of a PM task using Sigma Reliability's unique techniques
- Eliminate those tasks that don't make sense
- Modify the tasks that need refining
- Add tasks as required
- Organize PM plans at an equipment class level for enterprise-wide deployment
- Document your PM plans to codify and protect your know-how, enable customization and provide a basis for continuous improvement.

Grounded in sound reliability engineering principles, our process teaches you how to conduct FRACAS-based PMO, which is driven by existing data, judgment-based PMO, which is based on using the Delphi method to gather the collective wisdom of your experienced team in an unbiased manner, and the RCM-based approach, which is used sparingly. You'll also learn how to properly document PMs, create machine class standards for enterprise deployment and manage change and innovation in the process.

In many instances, we wind up spending less on preventive maintenance, but the true objective of this course is to teach you how to make sure that every dollar you spend on preventive maintenance is improving reliability and creating financial value for your firm.

Turn Training into a Game Plan!

2-Day Preventative Maintenance Optimization

Price: \$7,000 for up to 25 Students.

Additional Students: \$130 each.

1-Day Preventative Maintenance Optimization

Price: \$3,500 for up to 25 Students.

Additional Students: \$65 each.

Courses can be customized to meet your needs.

Additional fees may apply.
